

Homeopathic Treatment for Cancer

May 20-21, 2017 by Dr. Arup Bhattacharya PhD, DHM, Hom(ON), RSHom (NA)

Cancer is one of the leading cause of death worldwide. Cancer patients and survivors increasingly approach homeopaths for finding succor at various stages of the disease including during conventional treatment. Homeopathy has much to offer and can help improve remission, survivorship, palliative care (including quality of life issues) besides combating side effects from conventional therapy.

Spend a full weekend learning the basics of cancer biology with delineating characteristics for selecting different homeopathic medicines in-depth with their indications for different cancer types and disease sites from an eminent homeopath and cancer research faculty - Dr. Arup Bhattacharya PhD, DHM, Hom(ON), RSHom (NA). Dr. Arup is an Affiliate Member in the Department of Pharmacology and Therapeutics at Roswell Park Cancer Institute, a National Cancer Institute designated comprehensive cancer center. He is a homeopath educator and practitioner since 1992 with his current practice based in Buffalo, NY.

Attendees will be awarded 12 credit hours toward continuing homeopathic education towards NASH (NA) and College of Homeopaths, ON
