

Homeopathy Second Year Syllabus

Detailed live case taking, analysis and case management is learnt during the span of 12 months encompassing ~60 clock hours of in-class learning and ~60 hours of home learning. The modules are:

Module I: Homeopathic Methodology

- Nuances of the Classical method
- Layers method
- Human being in health and disease
- Miasms and how it affect the energy interactions
- Remedy reaction (Text book – Science of Homoeopathy by G Vithoukias)
- Newer Repertory analysis and factors that predominates in remedy selection

Module II: Materia Medica

- Essences of major and minor remedies - continued
- Remedy differentiation
- Therapeutic materia medica

Module III: Practical clinical Skills and Case management

- Clinical skills
- Client interaction and key case taking communication skills
- Case analysis
- Case taking techniques
- HIPAA and Code of Ethics

Module IV: Homeopathy – Disease approach

- Injuries and Trauma
- Vaccinosis
- Female Menstrual issues
- Diseases of the CNS

Module V: Practical Study (Hands on Case taking and management)

Besides the above, studies on Organon will be continued for an in-depth understanding of the homeopathic principles as laid down by Dr Hahnemann.
